

0352

Z = n° mazzetti / number of knots
n° de mèches torsadées

The conical shape makes these brushes suitable for sideways jobs on irregular surfaces, with edges, profiles and cracks. The twisted knots make them aggressive. The 24-knot versions ensure better performance thanks to a greater brushing area in direct contact with the surface.

TYPE OF USE

To remove slags, rust and residues from surfaces of any shape and material.

MM		INCH
