

0864

Shank-mounted wheel brushes made of highly resistant crimped wire with high wire density. They ensure long service life and great performance in various industrial processes. Suitable to be mounted onto fix machines and machining centres. GG wheel brushes are engineered for heavy-duty applications and with higher rotation speed. They allow you to reach the desired result in less time and with increased aggressiveness. They can be mounted on air tools as well.

The HEX line features a 6.35mm - 1/4" hexagonal shank that is suitable for any type of spindle or screwdriver and allows for quick coupling.

TYPE OF USE

To remove slags, rust and processing waste from surfaces of any material and shape.

Le dimensioni, le illustrazioni, le caratteristiche tecniche, le referenze e tutti gli altri dati contenuti nel catalogo possono essere modificati da SIT senza preavviso. Tutte le dimensioni riportate sul catalogo sono da considerarsi nominali e, se non diversamente specificato, sono in mm. Diametri, sporgenze e spessori degli insiemi di filamenti, costituenti le spazzole, sono da considerare tali solo approssimativamente.
The dimensions, illustrations, technical characteristics and all other data contained in the catalogue may be changed by SIT without prior notice. All dimensions on the catalogue, unless otherwise specified, are in mm. Diameters, protrusions and thicknesses of sets of filaments forming the brushes are only approximate.
