

## Wheel brushes GG

Shank-mounted wheel brushes made of highly resistant crimped wire with high wire density. They ensure long service life and great performance in various industrial processes. Suitable to be mounted onto fix machines and machining centres. GG wheel brushes are engineered for heavy-duty applications and with higher rotation speed. They allow you to reach the desired result in less time and with increased aggressiveness. They can be mounted on air tools as well.

### TYPES OF USE

To remove slags, rust and processing waste from surfaces of any material and shape.
