

Gutter Guard

Flexible spiral brush, made of PPL, 3m-118" long and modular. The gutter saver is an original product by SIT Tecnospazzole that, in a simple yet brilliant way, prevents leaves, branches and other waste from settling inside gutters or pipes and under solar panels. Once manually placed inside the gutter or the drain, or under solar panels, the save gutter works in complete autonomy. We suggest a simple and regular maintenance by removing the brush when it is dirty, washing it under running water and repositioning it as before, this way it almost has a never ending life!

TYPES OF USE

Gutter, canalization and solar panels protection. It can be used to prevent the growth of bushes in ground drains.
